- f00a2 – Feelings
- f08ee – Language

The screenshot shows the Educandy website. At the top right, there are links for "Download the free app" and "Trying to sign in?". Below these is a search bar with the text "Have an activity code?" and the code "efe84" entered. The main banner features the "educandy" logo in colorful letters, a play button icon, and several colorful cartoon characters. Below the banner, there are three columns of text:

- You create...** With Educandy, you can create interactive learning games in minutes. Download the Educandy Studio app and enter the vocabulary or questions and answers and Educandy turns your content into cool interactive activities.
- You share...** Once you've created an activity, a unique code is generated. Simply share that code with your students so they can play the game on their own device. Or you can embed the game into your own website.
- They play!** Students can play the games you've created on their own device by visiting the Educandy website or downloading the Educandy play app on their tablet. The games can also be played on the interactive whiteboard.
